Don't Feel Trapped, Feel Safe

What is this platform that you are coming up with?

Almost everyone in DEFI space has been scammed or got trapped in a rug pull in one way or the other. So, this team has taken the onus on themselves to come up with a platform where you will get all the legit DEVS (with KYC), list of their successful projects and also upcoming ones with jaw dropping details, doxxed Influencers and service providers at one platform. Investors will be able to rate the projects, Devs, Service Providers, Influencers & promoters with 'TRAP Points' from 0-10, with 0 trap points meaning extremely safe, 1-2 being safe, 3-5 being moderate, and 5-9 being dangerous, and 10 being extremely dangerous. The rating ecosystem will be built on blockchain, thus being immutable and transparent.

Booby Trap

Our platform will have a space 'BoobyTrap' (Yep! That is where we trap and kill those bloody Scammers and Fraudsters) to list all potential Rugpull & Honeypots with details regarding owners' wallets, their transfers to other wallets, the exploits found in the contracts and the whole checklist. These details will help investors and service seekers to make a wise investment decision keeping them safe.

Safe Heaven

Another section of our platform called "Safe Heavens" will list all highly rated Devs, their projects, Service providers, Influencers and Promoters who have delivered well in the past. One place to find most promising projects and services and achieve financial freedom for all investors across the DeFi space.

What timeframe are you looking at to develop something as elaborate as a marketplace for projects, Service providers, Promoters and Influencers?

26th Dec - Mid Jan

We are running our whitelisted Private Sale till December 31st (Go Grab your whitelist ASAP). The Devs are in process of developing the platform, you will get every update and glimpse of the platform from time to time on our social media platforms. However, we will be having our Pre-Sale in Mid-January, 2022 and will be only hosting Pre-Sale when we have our platform live and trapping scammers. So, Platform will be ready by Mid Jan, 2022.

What made you come up with the name “Booby Trap” and the idea for such a platform?

Ideation

It is high time that we trap and kill the scammers and fraudsters running amok in DeFi space. BoobyTrap has a dictionary definition as “a trap intended as a practical joke, especially one involving an object placed on top of a door ajar ready to fall on a person passing through”.

The idea did come from a joke our owner shared with his friend over a drink but took a serious shape as there is enough realisation that the DeFi space is filled with scammers and fraudsters and it is high time something was done about it. We intend on being the 911 of DeFi space and those in stress can give us a shout out.

\$BBT ecosystem will be building an extensive trap for scammers and fraudsters over the period of its development and a safe haven for investors, thus making the DeFi space a safer place.

How do you plan to keep investors and the community safe from potential rug pulls and scams in DeFi?

911 of the DeFi World

We will be developing an ecosystem by creating a platform where only legit devs, influencers/promoters and service providers will be listed. They will be listed on the platform after KYC and ticking our listing parameters which will make them eligible for a rating system. On the basis of the ratings one can contact a dev, influencer/promoter or service provider according to their requirements and investors can invest in their projects on the basis of the ratings which will keep them away from the scams.

Moreover, we are calling ourselves the 911 of the DeFi world which means the community we are building can contribute in shouting out against potential scams and rate legit ones positively because at the end it is by the community for the community. We will also be coming up with Investor Education Programmes (IEP) on our platform which include videos, articles and AMA sessions on how to invest safely in DEFI space. We are targeting building a strong community by providing them a safer place and also educating them to turn them from an average ape into a smart investor.

Do you have enough funds for the development of such a platform?

We have a strong team behind it with ample resources, but to pass on the maximum profits back to the community we are having our private sale on December 26, 2021 to reach a number of people to advertise and market our product.

For more details stay trapped in our TG (<https://t.me/boobytrapbsc>) and social media handles.

Is it going to be a decentralized app (DAPP)?

Without a question, we are the 911 of the DeFi world and the only way to remain transparent and incorruptible is to be on a blockchain. Our rating system will be entirely on blockchain, thus being immutable and transparent. Just connect your wallets to be a part of our ultra safe community.

Will the platform be ready before launch?

Our Plans

Yes, the devs are already working hard on building the platform. Once we are done with our private sale and whitepapers, we will be posting every detail of the development on our social media platform. Moreover, we will be having our presale only after we have the beta version of the platform ready for the community for testing and feedback. For more details [Stay trapped on our channel.](#)

What are your tokenomics?

Token Distribution

A total supply of 911,911,911 (10.5% of supply reserved for private sale, 46.5% for pre-sale and 32.5% for Launch, 3% reserved for airdrops to existing holders from V1 and rewards for promotions being run, 7.5% reserved for our team)

Tax Distribution

6% Buy Tax

Marketing – 4%, Liquidity
1%, Reflection – 1%

9% sell tax

Marketing – 4%, Liquidity
1%, Reflection – 4%

Happy hours on Weekends

0% Buy Tax

25% sell tax

Marketing – 8%, LP 5%,
Reflection – 12%

LP Lock: 3 Months initially (relocked for 3 months before expiry). Prices shown above may change owing to change in BNBs price. For more details go through our tokenomics, feel free to scroll through our pinned msgs on [our official TG](#).

Airdrop to Team Holders: 7.5% approximately

Pancakeswap Launch

32.56% Liquidity

Price \$0.0004950858603

1211911 Tokens/BNB

Does \$BBT have anti-bot and anti-dump measures?

Most of the supply is allocated for Presale and Launch i.e. 79%, and the private sale tokens i.e. 10.5% will be vested in three blocks (40% at launch and rest 60% in two batches one after two weeks of launch and another after four weeks of launch). Team tokens i.e. 7.5% are also vested over a period of six months from launch. This ensures that at launch no one will be holding any substantial amount and hence prevent dumping. In Fact the most a single wallet can hold at launch is ~\$1200, that too from presale.

2% Max Wallet

After launch we promote free and fair trading and hence will have a 2% max wallet limit. Whales are a necessary evil for the volume and growth of any token and we want to promote whale entries as well as protect our small investors from the manipulations.

Antibot Measures

Our token contract will have necessary antibot measures which will prevent sniping at launch. So rest assured, you are in one of the most SAFU projects on BSC.

What are your marketing plans for such a platform that you are building?

Our Plan

We acknowledge the challenge of bringing trusted and legit devs, influencers/promoters and service providers on platform and doxx themselves. Our team is already in talks with a number of devs for listing and we will be building strong partnerships with the most trusted devs in the DEFI space and help them gain more trust by bringing them recognition for their exceptional work.

For consistent growth of our platform, we will be doing rounds of AMAs, Twitter promotions and shout outs, run IEP (Investor Education Programs), and articles on major platforms to bring in people who believe in our efforts to create a safer DeFi world.

What are the reasons for migrating to a new contract?

Necessary Measures

The V1 contract that we launched with was non-accommodating with our grand vision of the platform that we have. The liquidity we launched with was very small and even small buys had a huge price impact. We could definitely not take that forward to the entire DeFi space that we are targeting with our platform. In order to accommodate our grand vision, we had to decide to migrate to a newer contract and take this project to the entire DeFi space and make it known to everyone trying to make a safer and better DeFi.

Strong Community

We have an amazing community that held onto us and came aboard our grand vision. We will be airdropping 63% additional tokens from V2 contract to our existing holders for their continuous support and trust. We have already reserved 2.94% supply of tokens for this purpose.

Why should we invest in \$BBT?

Our Platform

The real question is, why would you not want to invest in a grand vision that we have? Our platform will list the most trusted devs, service providers, influencers/promoters that are delivering quality projects and services. A one stop platform for all investing solutions. We are going to be huge and those on boarding this train in time will benefit hugely.

Diamond Hodlers

Our community will specifically enjoy our premium listing services and a section of the platform will be reserved only for those holding \$BBT tokens. It is your 'PASS' to the 'Safe Havens' on our platform. So come aboard and let's make DeFi a safer place.

**Let's make DeFi a
safer place together.**
